CALIFORNIA'S EX-SENATOR IS NOM-INATED FOR GOVERNOR.

Republican Convention Adopts Nervy Platform Declaring for Free and Unlimited Colonge of Silver, Absolute Probibition of Immigration of Foreign Laborers and for Woman Suffrage and An-

other Admin Istration.

SACRAMENTO, Cal., June 20 .- Morris M. Estee, of Napa, was nominated for governor today by the state Republican convention. None of the other candidates made a strong showing, though there was some opposition this morning. A test vote came on an amendment to the report of the committee on order of business, which was offered by the anti-Estee men. The amendment provided that the nomi-nation for judges of the supreme court should be made before that of governor. The Estes men opposed this and defeated the amendment by a vote of 403 to 341. This showed Estee's strength and the back of the opposition to bim was broken. The convention proceeded according to program and the platform was adopted without contest.

SYNOPSIS OF PLATFORM. The platform adopted by the Republican convention indorses the national platform of 1892 and again indorses the McKinley bill. The nominees are pledged to make the state tax levy not more than 50 cents on \$100. The repeal of the federal election law by the Democratic congress is denounced, and the Wilson bill condemned as a sectional attempt to injure the producers, manufacturers and laborers of the nation, and a corrupt surrender to the trusts, which will result in raising the price of the necessities of life and at the same time constantly increase the deficiency in the national revenue, which deficiency will be met by such odious war measures as the income tax and increased Internal duties. The treatment seconded satiors and soldiers by the interior department in payment of pansions is denounced as an insuit. Both state and national systems of irrigation are favored. The scheme to place wool on the free list is denonneed and a demand made that this great industry be guarded by appropriate legislation from unfair competition with foreign countries. The silver plank is as

We favor free and unlimited coinage of silver at a ratio of 16 to 1 and the making of silver as well as gold legal tender in payment of all debts both public and private, and we pledge our congressional nominess to support the principles con-tained in this resolution." The immigration plank is sweeping. It

demands the enactment and strict enforce pent of such laws as will absolutely and effectually prohibit the immigration of all foreign laborers, both skilled and un-skilled, into this country. Government aid in the construction and management of the Nicsragua tcanal is demanded and a competing transcontinental railroad to San Francisco and competing lines throughout the state is favored.

Mob violence and anarchistic outbreaks are denounced and protection for life and libesty and property are domanded. The enforcement of the Chinese exclusion act and other legislation looking towards the removal of the Chinese from the country are demanded, and the action of the pres-dent in suspending and thus practically nullifying this whole-some legislation, and his attempt by treaties with the Chinese to abrogate this law, is de-

woman suffrage plank is as follows: "Believing that taxation without repre-sentation is against the principles of good we favor the right of suffrage to all citizens of the United States, both men and women." The platform demands of congress the retention of the duty of 21 cents per pound on layer raisins and the imposition of a ctive duty on Zaute currants and al

protective duty on Zante currants and all other dried grapes and fruits. The convention then proceeded to make nominations. M. M. Estee of Napa, State Treasurer John McDonald of Stockto eneral N. P. Chipman of Red Buff, and W. Preston of Sau Mateo, were placed There was a stampede in Estee's favor

PATE OF THE TARIFF BILL. The House Helpless in the Final Shaping of Its Measure.

WASHINGTON, June 20.-In a week or wo the tariff bill will be submitted to conference. There has been a good deal of wild talk about what the free traders in the house will do with this, that, or the other section of the senate bill when it comes to them. The fact of the matter is they will have no opportunity to tinker different schedules, adjust conflicting interests, or go into the "concession" business innuguested by the senators.

In the first place the bill will never come before the house again for votes on separate amendments. The house may vote to give its conferees certain instructions on certain features of the bil power, and if the house conferses find themselves quable to follow out instructions there will simply be deadlock until one body surrenders, a experience has shown that it is always to nonse that runs up he water hag, when the tariff bill has passed the senate and is returned to the house the next step ought to be its reference back to the committee on ways and means. But Mr. Wilson, chairman of the com-

SNUBBED BY OPERATORS.

But Mr. Wison, chairman of the committee, will waive that the house disagree to certain amendments to which the sensing a concurrence of the house and that the sensite be invited to appoint conferees. The motion will, of course, be adopted in a trice. Then the conferees are appointed. The number is a matter of no especial importance, since the conference does not ballot as a sum; but as two committees, each of which acts by its own

committees, each of which acts by its own majority vote. It is perfectly competent for the house to vote its conferees certain instructions One of these instructions will probable be to stand out for free sugar. Af er s few days session Mr. Wilson will probable as-nounce in the house that the confe e s 'alter a full and free conference here unable to agree on the sugar schedule.
Then the house will instruct its conferers
to "insist" on its sugar schedule. At the
mat report the house will instruct its
conferers to "adhere" to its position, and when this stage has been resched further course remains but an indefinite deadlock or a surreader. There are usually two "full and free" conferences before either body gets to the "adhere" state. CURIOUS USE OF TOBACCO. People Who Smake from the Age of Fire

Years. All the Lushai smoke inveterately, even children of five years of age, and their children reek with rank tobacco smoke, says a writer in Gentleman's The men use short pipes made of bamboo: the women use a more elaborate one, the bowl of clay communicating to a stem with a receptacle for water, through which the smoke passes to a long, slender mouthpiece of ornamental metal. The water in the receptucie, when fouled by tobacco juice, is emptied into small gourds stoppered with a play of wood. These gourds are earried by the men in cotton bags with other necessary articles for traveling, and a mouthful of the contents is occasionally sipped and the month rinsed therewith, when it is epst out.

It is considered polite to offer a sip from this gourd to a friend, as a pinch of smiff was formerly in Europe. A friendly native will do so even to an Englishman, but the writer has never heard of unyone except Maj Lewis who has had the courage to accept the compliment. That officer, when depoty commissioner of the Chittagony hall tructs, rendered himself thoroughly familiar with the habits of the border tribes, and is probably the best authority on all matters regarding those dwelling near the Chittagong frontier. The writer purchased and brought to England one of the small gourds which are here spoken of the contents of which, with disasteous effacts, were spilled over the papers contained in his dispatch box.
